DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of group I comprising claims 25 – 35 in the reply filed on 4/14/2008 is acknowledged. Claims 36 – 38 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 25 – 35 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Regarding claim 1, the scope of the claimed method is broader than what is enabled by the specification. For example, the specification is not enabled for all gas treatment processes, but involves specifically an air separation process using a gas treatment unit comprising an air separation unit. Therefore, the air separation unit can be considered a critical feature of the claimed method. A feature that is taught as critical in the specification should be recited in the claims (see MPEP § 2164.08c).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 25 – 35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 25 – 35 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are:

Regarding claim 1, it is unclear as to how the fluid is produced to a specific characteristic, such as purity, flow rate, temperature, pressure, with in each time period with respect to the cost of electricity and power consumption. Furthermore, the method of claim 1 does not positively recite an air separation unit. The gas treatment process as indicated by the specification involves specifically an air separation process using a gas treatment unit comprising an air separation unit. Therefore, the air separation unit can be considered a critical feature of the claimed method. A feature that is taught as critical in the specification should be recited in the claims (see MPEP § 2164.08c).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional cited prior art teaches gas processing methods.
